1. UNPACK & VERIFY ALL PARTS

12 × 24"x16" greenery panels

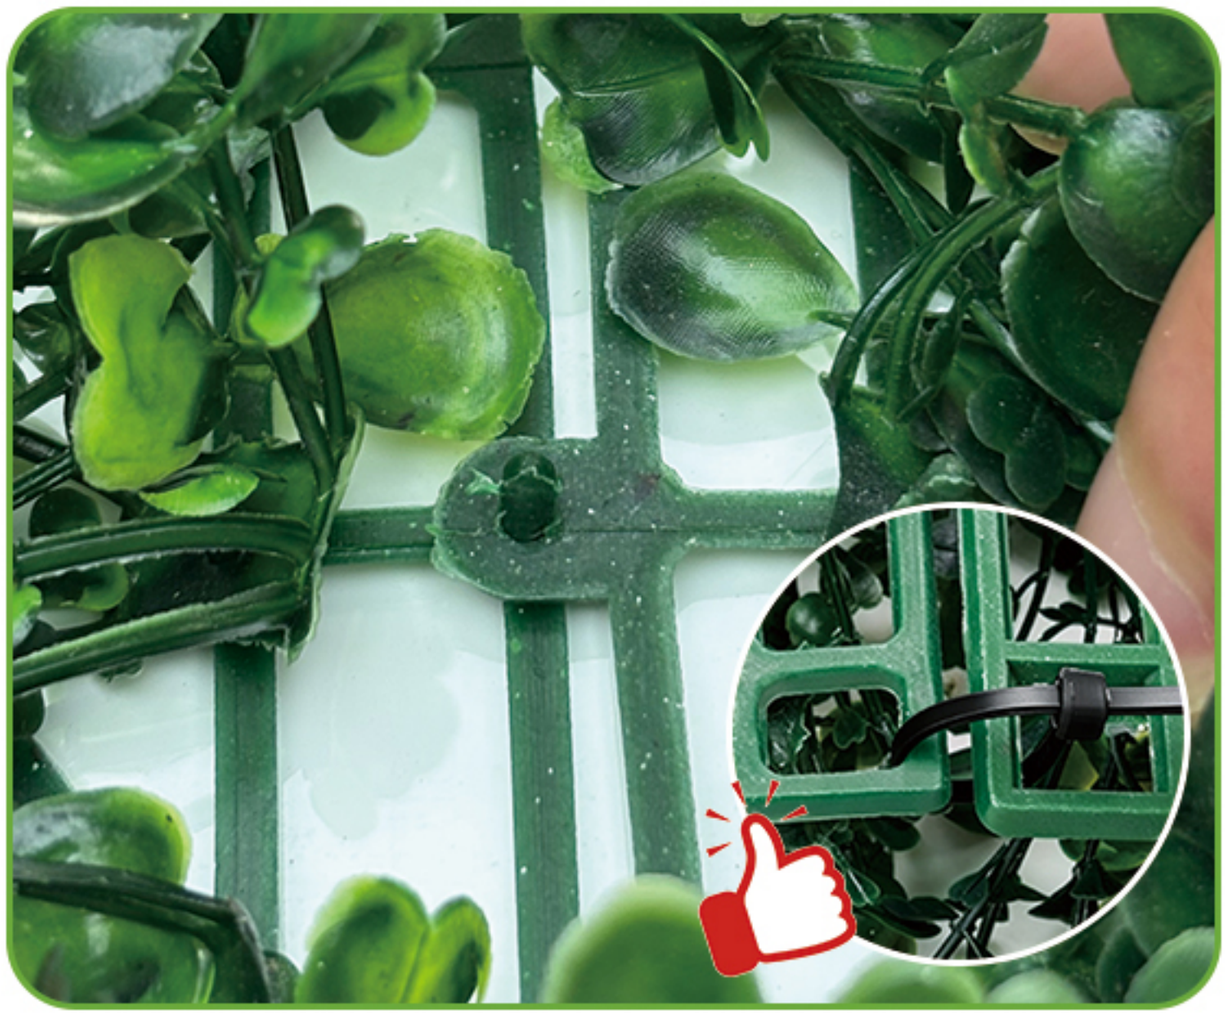
1 × glove

100 × zip ties

1 × LED string light

Note:The LED string may be packed separately or tucked inside the greenery for protection.

2. CONNECT PANELS USING SNAP-LOCK BACKING



Align the edges of two panels, Press firmly until the snap-locks click together, Continue connecting panels to form your desired size, You may also use zip ties between panels for extra security.

Tip: Build the full wall on the floor first for easier alignment.

3. TRIM PANELS TO FIT YOUR SPACE

Use scissors to cut along the grid backing, Panels can be resized without damaging the leaves

(Note: Please cut to fit the dimensions of your wall.)

4. ADD LED STRING LIGHTS (RECOMMENDED BEFORE MOUNTING)

Weave the LED string through the greenery while the panels are laid flat Adjust spacing for an even, balanced glow, Ensure the power end is positioned where you want it

5. INSTALL PANELS ON YOUR WALL OR FENCE

Hold the panel in place, Use zip ties to secure it to fences, grids, or frames For solid walls, use nails, hooks, or adhesive strips (not included)

IMPORTANT NOTES

- Panels and lights are not pre-assembled
- LED string may be packed separately or hidden inside the greenery
- A mild shipping smell may occur and will fade after airing out for 24–48 hours
